

Gruppo Fontana: Sustainable Procurement Policy

Gruppo Fontana is committed to ensure that the goods and services it purchases are manufactured, delivered, used and disposed of in an environmentally and socially responsible manner, delivering long term value for money for itself and the clients it serves.

Preparing and implementing this policy, Gruppo Fontana wants to include the consideration of the environmental, social and economic impacts into all its decision processes, with the primary focus of:

- reduce environmental footprint, including but not limited to energy consumption, wastes and GHG emissions, adoption of sustainable logistics approach, etc.
- improve public health and quality of life: ensure respect of human rights and fair pay and working conditions throughout the supply chain;
- pilot economic growth, focusing on supporting local and small/medium sized companies and considering life-cycle costs/benefits of products.

To achieve its purposes, Gruppo Fontana is committed to:

- define targets and implement actions in support of this policy - endeavouring to continuously improve the sustainability level;
- prioritise the selection of suppliers who adopt sustainable and ethical practices;
- identify areas of sustainability improvement within and outside the organization and work, in strict cooperation with its supply chain, to deliver a positive impact on that;
- comply with current - and future - legislation requirements.

This policy shall be distributed and communicated within the organization and all along Gruppo Fontana's supply chain. In particular it shall be addressed to Gruppo Fontana's direct suppliers who shall be engaged to adopt sustainable approaches and provide proper sub-contractors/suppliers. Gruppo Fontana expects that all its suppliers work in a collaborative and proactive manner to achieve the goals of this policy.

This policy will be subject to regular revision and evaluation to assure its adoption at all levels and the continuous improvement of its results.
